

# Homework/Extension

## Step 2: Factors

### National Curriculum Objectives:

Mathematics Year 5: (5C5a) [Identify multiples and factors, including finding all factor pairs of a number, and common factors of to numbers](#)

### Differentiation:

Questions 1, 4 and 7 (Varied Fluency)

**Developing** Identify pairs of factors using knowledge of the 2, 3, 5 and 10 times table. Factor pairs can be found vertically or horizontally.

**Expected** Identify pairs of factors using knowledge of times table facts up to 12 x 12. Factor pairs can be found vertically or horizontally.

**Greater Depth** Identify pairs of factors using knowledge of known times table facts to 12 x 12 and beyond. Factor pairs can be found vertically, horizontally or diagonally.

Questions 2, 5 and 8 (Varied Fluency)

**Developing** Using knowledge of the 2, 3, 5 and 10 times table, travel across a grid by finding factors of a given number.

**Expected** Using knowledge of times table facts up to 12 x 12, travel across a grid by finding factors of a given number. Includes factors up to 12.

**Greater Depth** Using knowledge of known times table facts to 12 x 12 and beyond, travel across a grid by finding factors of an unidentified number.

Questions 3, 6 and 9 (Reasoning and Problem Solving)

**Developing** Spot the odd one out when using arrays to multiply factors. Requires knowledge of the 2, 3, 5 and 10 times table.

**Expected** Spot the odd one out when using arrays to multiply factors. Requires knowledge of times table facts up to 12 x 12.

**Greater Depth** Spot the odd one out when multiplying factors. Requires knowledge of known times table facts to 12 x 12 and beyond.

# Factors

1. Find and circle pairs of factors on the grids below. Factor pairs are adjacent to each other and can be found vertically or horizontally.

Factors of 20

7	1	20
5	3	9
4	10	2

Factors of 12

1	5	8
12	6	2
4	3	10

VF  
HW/Ext

2. Travel from the start to the finish by colouring the factors of 18.

Start		
1	10	5
18	2	9
4	7	3
8	11	6
		Finish

VF  
HW/Ext

3. Spot the odd one out and explain why.

RPS  
HW/Ext

# Factors

4. Find and circle pairs of factors on the grids below. Factor pairs are adjacent to each other and can be found vertically or horizontally.

Factors of 16

3	9	10	4
2	8	5	4
5	11	16	7
12	3	1	6

Factors of 40

12	11	6	1
5	9	20	40
10	4	8	7
2	15	5	6

VF  
HW/Ext

5. Travel from the start to the finish by colouring the factors of 24.

Start			
2	6	7	11
21	12	1	20
10	9	3	9
23	16	4	8
18	5	22	24
			Finish

VF  
HW/Ext

6. Spot the odd one out and explain why.

A.

B.

C.

D.

RPS  
HW/Ext

# Factors

7. Find and circle pairs of factors on the grids below. Factor pairs are adjacent to each other and can be found vertically, horizontally or diagonally.

Factors of 28

3	9	6	1
11	2	12	28
8	7	14	5
4	5	10	6

Factors of 30

2	4	8	5
11	15	3	6
7	10	12	8
4	9	1	30

VF  
HW/Ext

8. Find a route from start to finish that travels through factors of the same two-digit number. Clue: The digits of this number total 6 when added together.

Start			
6	21	9	5
10	7	4	8
1	2	12	11
9	14	42	3
4	5	10	1
			Finish

VF  
HW/Ext

9. Spot the odd one out and explain why.

B.  $6 \times 8$

C. two multiplied by twenty-four

D. three lots of fifteen

RPS  
HW/Ext

# Homework/Extension

## Factors

### Developing

1.  $20 = (1 \text{ and } 20), (5 \text{ and } 4), (10 \text{ and } 2)$   
 $12 = (1 \text{ and } 12), (6 \text{ and } 2), (4 \text{ and } 3)$
2. The factors from start to finish are: 1, 18, 2, 9, 3 and 6
3. B is the odd one out because the others are multiplying factors of 30. B is multiplying factors of 25.

### Expected

4.  $16 = (1 \text{ and } 16), (2 \text{ and } 8), (4 \text{ and } 4)$   
 $40 = (1 \text{ and } 40), (4 \text{ and } 10), (5 \text{ and } 8)$
5. The factors from start to finish are: 2, 6, 12, 1, 3, 4, 8 and 24
6. B is the odd one out because the others are multiplying factors of 36. B is multiplying factors of 33.

### Greater Depth

7.  $28 = (1 \text{ and } 28), (2 \text{ and } 14), (4 \text{ and } 7)$   
 $30 = (1 \text{ and } 30), (2 \text{ and } 15), (3 \text{ and } 10), (5 \text{ and } 6)$
8. The number is 42 and the factors from start to finish are: 6, 21, 7, 2, 14, 42, 3 and 1
9. D is the odd one out because the others are multiplying factors of 48. D is multiplying factors of 45.
